🚦 Budgets V2: Meeting Actions AND Data X Dev Feedback

MEETING ACTIONS
BUDGET UI FEEDBACK

MEETING ACTIONS

Date Raised	Meeting Actions	Owned by	Status	Comment	
22/10	Romy to work with Stephen to source contribution rates for 150 hybrid clients in portal with no contribution rates. We will provide this list to katja to push through API	Romy, Stephen	Blocked	• RB: investigated and unable to obtain contribution rates from PRODA. Action now for @katjap to merge maximum contribution rates based on pension status for any hybrid client with no contribution rates.	
22/10	Tim Maier and Matthew Allan to query budgets with a coordinator loading, but $0 and push a new submission with correct coordinator loading	Tim, Matt	Complete		
22/10	Tim Maier and Matthew Allan to fix utilisation list view with correct	Tim, Matt	In progress	• MA: The package utilisations table now counts all active packages in portal. Any packages without a service plan will be counted as under 50% utilisation	

	number of active clients			• MA: Page is now slow to load... looking 👀	
22/10	• Romy to provide email templates to Tim for bulk emailing service plans	Romy	Complete	Romy still needs to provide post Nov 1 template	
22/10	Tim Maier and Matthew Allan to work on a solution for coordinators to be able to **decrease** their loading % at a book level and have this update all of their clients service plans	Tim, Matt	in progress	While this is technically feasible, how it's designed, communicated, and released sits beyond the engineering scope. Given the potential user, operational, and downstream impacts, it should go through the standard product and design process to make sure it's implemented in the right way. Engineering will be actively involved in this process and is happy to contribute, we just want to ensure it's handled through the proper channels rather than as a purely technical change.	
22/10	Katja Panova and Matthew Allan to compare queries of active clients with no support at home service plan and	Katja, Matt	Complete	• MA: Tiny discrepancy between mine and Katja's query resulting in 33 vs 44. Mine was only looking at packages that have a HCP budget and not a SAH budget. Going to run with Katja's list 🙂	
22/10	Mckinley Swain to do a final data merge of HCP budget to service plan	McK	Complete	KP: Aiming to have it done 24 Oct am. Number of packages: 38	
22/10	Mckinley Swain to include September	McK	Complete	Updates happening currently. Must be completed one-by-one to avoid rate limiting	

	accrual balance to client files			issues. @Mckinley Swain ETA please? Expecting this to be completed by 10:30 after some adjustments UPDATE: Re-running for previously skipped Submitted service-plans. Now Completed.	
24/10	Bulk submit all remaining draft service plans	Tim, Matt	Completed	• MA: Tool is ready to go. Waiting to be ran on Monday	
24/10	Bulk generate Service Plan PDFs and email them out to all clients with a submitted budget plan	Tim, Matt	Completed	• MA: Tool is ready to go • MA: Email templates to be updated with Romy's latest before sending	
29/10	Portal - Inbox - Total active clients only	@Tim Maier @Matthew Allan	Completed	TP-2434: Add ability to to flick between onboarding and active package scopes on service plan inbox DONE	
29/10	Portal - Utilisation - total active client count		Completed	TP-2435: Add total active client packages count on the utilisation page in a card READY FOR QA	
29/10	Bricks - include tile - total active clients	@katjap	Completed	https://dbc-8629faad-d1c2.cloud.databricks.com/sql/dashboardsv3/01f0a2411e3013a49fe89c512312ef1e/pages/e86394da?o=2240404724941725	
29/10	Portal - Inbox - display 'Onboarding	@Tim Maier @Matt	Completed	TP-2434: Add ability to to flick between onboarding and active package scopes on service plan inbox DONE	

	clients' quantum and tile	hew Allan			
29/10	Tool - ability to submit clients that did not meet validation with ability to identify clients with 'filter' and banner on service plan page to easily identify clients	@Tim Maier	Completed	TP-2436: Add force submit draft service plan tool DONE	
29/10	Tool - ability to auto-submit IN REVIEW clients > run against validation > feedback mechanism > POTENTIAL to auto-submit when remove validation	@Tim Maier	Completed	TP-2437: Auto Submit Service Plans in "In Review" Status first with Validation and Feedback Mechanism then with optional override DONE	
29/10	Provide service plan sent email template to Tim	@Romy Blacklaw	Completed		
29/10	Data and Dev work together to identify the onboarding + active clients and provide a solution for how to get a SaH budget for	@katjap @Matthew Allan	open	I added a report that breaks down budget submissions for onboarding clients here: https://dbc-8629faad-d1c2.cloud.databricks.com/sql/dashboardsv3/01f0a2411e3013a49fe89c512312ef1e/pages/3885d47a?o=2240404724941725	

	these clients if required				
4 Nov	Supplements don't show on service plan page	Product	open	`CC: "Could you please advise where I can check if the client has a supplement included under the new budget?"`	

BUDGET UI FEEDBACK

Feedback/Concern (1) Where the issue was found (2) What's the error (3) What's expected (correct value)	**Impact**	**Triage** 🔴 I can't do my job without this 🟠 I can find a workaround 🟢 Nice to have/fix	**Owned by**	**Status**	**Person raising concern**	**URL**
UI is not intuitive to knowing that you need to duplicate a plan to make any edits to a submitted plan Edit is the expected terminology to		🟢 Nice to have/fix			RB	

make a change to a plan						
Budgets using unspent funds instead of using up quarterly budget first when both funding streams selected, is this a glitch? If I unselect unspent, save, reselect unspent it fixes it expected: for eligible services plan will first allocate to quarterly funds THEN unspent funds	plan inaccurate as we can't elect to use unspent funds first	🟠 I can find a workaround			RB	https://portal.trilogycare.com.au/pages/packages/1616/budget-plans/10083 https://portal.trilogycare.com.au/pages/packages/14049/budget-plans/11638 https://portal.trilogycare.com.au/pages/packages/17344/budget-plans/11614 https://portal.trilogycare.com.au/pages/packages/2626/budget-plans/11790
Can we add every three week in the options, as i have had a few client ask for this option.		🟠 I can find a workaround			RB	
UI could be more explanatory about which funding stream different services CAN and CANNOT be assigned to		🟢 Nice to have/fix			RB	

One off services assigned to unspent funds causing confusion of total planned spend Ideally show planned spend for the current quarter		🟠 I can find a workaround			RB	
Is there a way that we can make the new SAH budget screen more "minimalist"; I would think this could make the transitions/loading up of the new budget quicker (switching between new and old budget screens)		🟢 Nice to have/fix				
2. Following up the above feedback, similarly to what Jackson S. (CP) had proposed, can we have a summary similar to the old budget screen instead of having to click the dropdown bar; e.g., Domestic Assistance		🟢 Nice to have/fix				

(Frequency, Units, Rates & 4-weekly Total) Maybe switching it up and present the summary of the budget (when we hover over the budget line) and only show the entire budget details inc. planned/projected to spend when we click the drop down bar.						
Similarly to the 1st point, having to save each budget amendments individually and having to wait for them to load one after another can be a bit counter-productive in a way that it takes up more time. Can we have one save button at the top right (similar to where "submit" is) or at the bottom of the page after we completed budget		🟢 Nice to have/fix				

amendments? - Personally, when it comes to amending budgets, we'd usually have to change more than one budget items and clicking just one button to save everything would save a lot more time.						
Coordinators raising that screen is blurred on laptop		🟠 I can find a workaround				
• Budget items like falls alarm, nutritional powder, items etc. needs its own rate card section where its quantity and price rather than only hours and rate. • Frequency on services like home maintenance need more frequencies than weekly, f/n, mth, as required. (it needs 3, 6, 8, 13						

weekly, biannual, and annual) (drop down needs section) • No option for requires falls alarm, only if they are already accessing it (drop down menu needs section) • It would be good if it automatically had the needs entry show up on care plan and have a tick box if you don't want it, rather than vice versa. • Fields with * are able to be saved without being filled, then details with no * on the text box is required to be filled (description in needs)						
Hi, I've a feedback from my coordinator, can we include the CR name in the						

"Service Plans" Inbox?						
Service plan PDF language **Planned services** 'A list of services planned for you. Check with your care partner whether these services require scheduling with a supplier.' can we change this to 'planned with you' to reflect the collaborative process and requirements	SQS risk	🟠 I can find a workaround			Romy	
Has there been any update on Unspent Funds only showing from the quarter we are planning in? I understand Unspent Funds and other funding streams are not bound to one quarter however this would be a lot easier to track and plan a budget for one quarter if it		🟢 Nice to have/fix			Care - Alex E (Stephen)	https://portal.trilogycare.com.au/pages/packages/14695/budget-plans/11940

only displayed for the quarter we are looking at. Would it at least be possible to add a toggle to switch from 'total planned' to 'planned this quarter' Here is an example that was spoken about previously. When you change the dates start dates to Oct 1, it halves the planned to spend in unspent funds.						
any chance we can have the following? 1. Clinical relies on the risks details and action plan identified on the portal for escalation and other clinical review. Now we need to go through each risk one by one, making it so that		🟢 Nice to have/fix			Care - Janith (Stephen)	

we spend a significant amount for reviews. Perhaps the details and action plan might be auto populated in the future, but we need something to work with now.						
2. Under the new portal changes, there is no mention of gait aids, appropriate footwear, etc for Falls Interventions in Risks. There is an other tickbox, but it cannot be populated.						
3. Clinicians cannot access recent bills to troubleshoot concerns around services, care and welfare.						
4. Unable to see last care plan						

review date clearly on portal.						
5. Clinicians cannot edit parts of the portal pertinent to clinical like ‘Medical Conditions’, ‘Medications List’, ‘High Risk Medications’.						
6. Unable to see important cognitive information clearly if they have dementia / cognitive impairment on portal. Usually, it needs to be inferred through the medical history or using the supplement (dementia) information lodged in the CRM. Ideally somewhere on the main page would be best.						

7. Clinical information is not clear based on the risk that has been identified.

Eg. CR's pain management is not adequate; pain rating is high 7-8/10. plan is partially controlled by PRN analgesia.

Feedback: Auto generate the free text area to allow further information to be provided to mitigate risks.

8. Not all risks have a action plan section that is mandatory, when it should be. It is there in some, but just a yes / no question. We always used to have details and action plans in place. Now we don't.

E.g. Allergies → Action Plan in Place → Yes / No (and that's it) 9. EPOA and AHD does not have a clear spot to be recorded. This is sometimes placed under the overview in the portal care plan and is exclusively recorded using the current onboarding questionnaire - there is no other way to get this information. 10. We also need to record Country of Birth for clients in addition to Nationality. This was something that we could not find during a EOL questionnaire from the government.						
Could we get the default frequency to be weekly instead of daily		🟢 Nice to have/fix			Care - Laura (Stephen)	

when adding a new service?						
tried to duplicate the budget, this error message-not sure if this needs to go into Portal instead.		🟢 Nice to have/fix			Care - Karen (Stephen)	
Can you add a field in the Portal which shows the “Total Coordination fee” for the period.		🟢 Nice to have/fix			Care - Laura (Stephen)	
Hi about the new budget, when CO sent a budget change, I don't see what has been changed and not sure what to approve...as before, I could easily see the change request and reject or approve straight away...can something be done to the new budget like before please....		🟢 Nice to have/fix			Care - Karen (Stephen)	
One of my team members suggested an idea for E-mail tagging improvement.		🟢 Nice to have/fix			IC - Van (Stephen)	

Essentially - to create an event-based add in for Outlook: 1. Run a code when the user clicks send 2. open a custom pop-up for tagging 3. Block the send until the tagging is complete If possible, we could have a pop with dropdown option available to choose from available tagging options.
